| <b>Date</b>          | 11 September 2026                                              |
| <b>Student Name</b>  | Yuvasri Malla                                                  |
| <b>Project Name</b>  | Licensed Software Installation Request through Service Catalog |
| <b>Maximum Marks</b> | 4 Marks                                                        |

| <b>UAT ID</b> | <b>Scenario</b>                    | <b>Acceptance Criteria</b>               | <b>Result</b>   |
|---------------|------------------------------------|------------------------------------------|-----------------|
| UAT-01        | Open Service Portal                | Portal is accessible                     | <b>Accepted</b> |
| UAT-02        | Find Licensed Software Request     | Catalog item is visible                  | <b>Accepted</b> |
| UAT-03        | Open Software Request Form         | Request form opens                       | <b>Accepted</b> |
| UAT-04        | Select Licensed Software           | Software can be selected                 | <b>Accepted</b> |
| UAT-05        | Enter Request Details              | Relevant fields are displayed            | <b>Accepted</b> |
| UAT-06        | Validate Mandatory Fields          | Required fields are enforced             | <b>Accepted</b> |
| UAT-07        | Submit Software Request            | Request is created successfully          | <b>Accepted</b> |
| UAT-08        | Approval Process                   | Request is sent for approval             | <b>Accepted</b> |
| UAT-09        | License Validation & Fulfillment   | License is validated and task is created | <b>Accepted</b> |
| UAT-10        | Complete Installation Request Flow | End-to-end workflow works                | <b>Accepted</b> |

## UAT Conclusion

The tested Licensed Software Request Management workflow satisfies the documented acceptance criteria for the implemented scope, including software request submission, validation, license checking, approval, fulfillment task creation, installation processing, and end-to-end completion.
